DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a first method.

Group II, claim(s) 6, drawn to a first product.

Group III, claim(s) 7, drawn to a second product.

Group IV, claim(s) 8-12, drawn to a first apparatus.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common subject matter linking the inventions lacks an inventive step over Stone et al., US 2003/0059657, cited on the Supplementary European Search Report (not yet of record) as an "X" reference (US '567 corresponds to EP 1263066). Accordingly, the inventions lack a common special technical feature that makes a contribution over the art. It is further noted that claims 6 and 7 are product-by-process claims and are only given patentable weight insofar as the structure implied by the process steps of claim 1 is present.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
